Walmart

Scintilla Case Study: Upfield

The opportunity: Improving product availability for brand-loyal customers

Upfield wanted to grow brand-loyal Violife customers into multi-category, large-basket repeat shoppers at Walmart by ensuring the full assortment of products was available where they shopped.

Brand-loyal customer expectations

Full cart | Weekly groceries
Multi category | Repeat shopper

Actual store availability

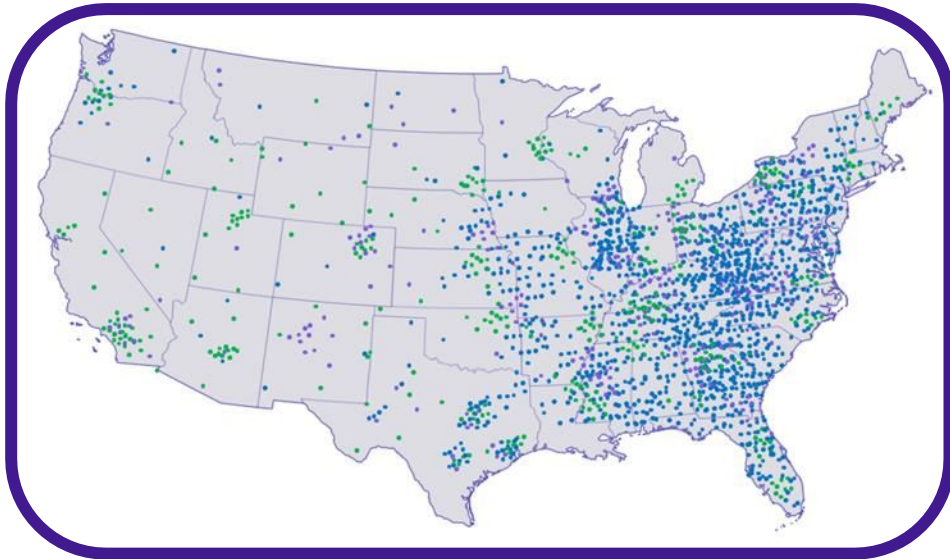

Left disappointed | Lapsed/leaking shopper
Limited basket

Scintilla Case Study: Upfield

The opportunity:

15+ dairy-free items are available to Walmart customers, but there was inconsistent assortment across stores due to conflicting strategies and limited visibility to actual customer data.

Five categories, four buyers, and four strategies lead to different Walmart assortments that impacted customer experience online and in stores.

Scintilla Case Study: Upfield

The approach: Leverage Scintilla Charter to zero-in on specific Walmart customers, stores, and plant-based sales data

1

Step 1: Confirm the need for a new strategy using **Channel Performance**:

Channel Performance

2

Step 2: Determine the recommendation using **Shopper Behavior**:

Shopper Behavior

Scintilla Case Study: Upfield

The results: A consolidated recommendation to Walmart Merchants for all Violife products

Upfield learned that over 50% of the best-performing plant-based stores carried three or less Violife items—and 110 of those stores didn't carry any.

With these new insights **Upfield can make a consistent store list recommendation** for all Walmart Merchants. Once adopted, customers will know which stores **carry all Violife** products, and **Merchants can see potential increases** in GMROI, velocities, market share, and customer satisfaction.

“Using Scintilla
we have a win, win,
win for the customer,
buyers, and our brands.”
